Certified Salesforce Developer with 6+ years of experience in designing, developing, and implementing scalable Salesforce solutions across Sales, Service, and Commerce Cloud. Proficient in Apex, LWC, process automation, and SOQL/SOSL queries, with expertise in data security and governor limits optimization. Skilled in requirement analysis, workflow automation, and CI/CD deployment using Azure DevOps, Bitbucket, and ANT Migration Tool, ensuring seamless integration and enhanced user experience.

Skills

- Technical Project Leadership
- Salesforce B2B Commerce
- Salesforce Integration
- Salesforce Tool Development
- Apex Code & Governor Limits Optimization
- JavaScript & Lightning Web Components (LWC)
- Security & Access Control
- Object-Oriented Programming & Design Patterns
- Data Migration & Large Data Handling
- CI/CD & Deployment Strategy
- Salesforce Performance Optimization
- Flow & Process Automation

Work History

Senior Consultant
Deloitte, Gurugram, India

Deloitte.
January 2024 - May 2025

- **Senior Salesforce Developer & Team Lead,** leading a team of **four developers** in designing and implementing scalable solutions.
- **Architecting and developing** B2B storefront portals and indirect implementation for **Imperial Brands**, ensuring seamless user experience.
- **Developing and enhancing key features** including P**ortalEnablement, Reeconnect Classic, Reeconnect Light, and flexible concept implementations** to improve business processes.
- Leading integration efforts for **Rebate Management, implementing batch classes, flows,** and optimizing system performance.
- Leveraging D**ynamic Page Experiences (DPE) and LWC for advanced customization**, UI/UX improvements, and responsive application development.
- **Streamlining deployments** and release cycles using **Azure DevOps and Bitbucket,** ensuring **version control** and CI/CD best practices.
- **Technology Stack:** Workbench, JavaScript, Salesforce LWC, Rebate Management, Batch Classes, Flows, DPE, Azure DevOps, Bitbucket.
- **Tools & Utilities**: VS Code, GitHub Desktop, Data Loader, Chrome Debugger, MS Excel, Salesforce CLI, Salesforce Inspector Reloaded, Lightning Studio.

Salesforce B2B Commerce Developer
Accenture, Pune, Maharashtra

accenture
September 2021 - December 2023

- **Led Salesforce configuration and development** efforts, specializing in **Commerce Cloud and Service Cloud** for **Unilever International.**
- **Designed and implemented** new features and enhancement modules for **Unilever International's B2B website**, improving customer engagement and business operations.
- **Configured and managed B2B** storefronts**, optimizing buyer account functionalities** and enhancing user experience.

- **Developed and optimized workflows, triggers,** and custom objects, ensuring adherence to Salesforce best practices.
- **Partnered with Customer Operations Managers** to identify and implement process optimizations, driving efficiency improvements.
- **Automated manual processes,** reducing operational overhead and enhancing system performance.
- **Created detailed system documentation,** covering both **code and configurations** for future scalability and maintenance.
- **Managed code deployments and repository** using **GitHub, VS Code, and modern DevOps tools** to ensure smooth version control.
- **Conducted client demos and developed user manuals,** showcasing automation benefits and improving user adoption.
- **Technology Stack:** Workbench, Data Loader, JavaScript, Salesforce LWC, Salesforce CPQ.
- **Tools & Utilities:** VS Code, GitHub Desktop, Chrome Debugger, MS Excel.

Salesforce Developer

Tata Consultancy Services, Indore , India — *September 2019 - September 2021*

- **Led Salesforce integration development** for the **Homeforce mobile application,** ensuring seamless connectivity and data synchronization.
- **Developed and optimized Apex Triggers and Controller Classes**, meticulously adhering to **SFDC governor limits for scalable performance.**
- **Maintained high Test Coverage,** ensuring application robustness through **unit and regression testing.**
- **Customized page layouts and Salesforce components**, aligning with evolving business and user requirements.
- **Managed end-to-end documentation, testing, and deployment** of new features, ensuring smooth releases.
- **Delivered impactful client demos and created user-friendly manuals,** enhancing user adoption and customer satisfaction.
- Enforced stringen**t code quality standards, validated through** rigorous testing and peer reviews.
- Designed and managed **complex workflows, triggers, and alerts,** improving application functionality and process automation.
- **Technology Stack**: Ionic, Cordova, AngularJS, JavaScript, Salesforce.
- **Tools & Utilities:** VS Code, Android Studio, Azure DevOps, GitHub Desktop, Chrome Debugger.

Full Stack Developer

Tata Consultancy Services, Pune , India — *November 2018 - September 2019*

- **Collaborated in UI/UX design and front-end development** for the Homeforce mobile application, ensuring a seamless and intuitive user experience.
- **Translated client requirements into scalable business logic implementations,** optimizing both f**ront-end and back-end functionality.**
- **Developed dynamic, interactive forms and custom UI components using JavaScript, AngularJS, and Salesforce, enhancing responsiveness and user engagement.**
- Implemented **RESTful API integrations,** ensuring smooth communication between the mobile app and Salesforce backend.
- **Led unit testing, regression testing, and systematic deployment**, ensuring reliability and scalability.
- Maintained **high code quality standards,** following industry best practices, design patterns, and **peer code reviews.**
- Designed and **optimized database queries** and workflows, improving system performance and data consistency.
- **Upheld code integrity across development stages**, ensuring maintainability and scalability in a **hybrid mobile app architecture.**
- **Developed hybrid mobile applications**, including Edocumentation, leveraging Ionic, Cordova, and AngularJS for cross-platform compatibility.
- **Technology Stack:** JavaScript, AngularJS, Node.js, Ionic, Cordova, Salesforce, REST APIs.
- **Tools & Utilities:** VS Code, Android Studio, BitBucket, Jira, GitHub Desktop, Chrome Debugger.

Trainee
Tata Consultancy Services, Thiruvananthapuram , India *September 2018 - November 2018*

- **Completed hands-on training in Java, JavaScript, SOQL, SQL, HTML, and CSS,** mastering **core programming concepts** and database management.

- Developed full-stack projects from scratch, **integrating CRUD operations,** database connectivity, and back-end logic.
- **Demonstrated proficiency in Java programming, object-oriented design, and SOQL queries for Salesforce data retrieval and manipulation.**
- Built and tested f**ront-end and back-end components,** ensuring seamless integration, and optimized performance.

Education

Bachelor of Engineering (B.E.) in Information Technology January 2018
Technocrats Institute of Technology, Bhopal

Higher Secondary in Mathematics Expected in March 2013
School for Excellence, Chhatarpur

Certifications

- Salesforce Certified Administrator
- Salesforce Certified AI Associate
- Javascript Developer I
- Salesforce Platform Developer 1
- Salesforce Platform Developer 2

Awards

- Move The Dot Award.
- Service commitment Award
- Best Team Award.
- Applause Award.
- ILP Kudos
- Applause_Award
- First runner-up in State Level skit competition
- First in speech competition at college level
